CAREER OBJECTIVE

Final-year BSc (CSE) student at IUBAT (CGPA: 3.82) seeking entry-level or internship roles. Hands-on experience building and deploying machine-learning solutions for computer vision, biomedical signal analysis, and time-series forecasting. Skilled in end-to-end ML workflows - data collection and EDA, model training and tuning, evaluation and explainability (Grad-CAM, SHAP) - and lightweight deployment using FastAPI/Flask and Docker. Proficient in Python, TensorFlow/Keras, scikit-learn, and XGBoost; familiar with PyTorch, experiment tracking, and MERN-stack development. Eager to take ownership of features, deliver measurable product impact, and learn production best practices.

KEY SKILLS

Programming	Python, JavaScript, TypeScript, C++, NumPy, Pandas, Plotly, Matplotlib, scikit-learn.
Deep Learning & ML	TensorFlow/Keras, PyTorch, XGBoost, CatBoost, LightGBM, Transformers, Autoencoders (VAE), OpenCV, GradCam, SHAP explainability.
Data & Research	Data preprocessing, feature engineering, chemical fingerprinting, cross-validation, EDA, model interpretability.
MLOps & Deployment	Streamlit, FastAPI / Flask, Docker (basic), GitHub Actions, reproducible pipelines, experiment tracking.
Full-Stack Development	MERN stack, JWT authentication, API integration, Tailwind CSS, Deployment on Render / Vercel.
Tools & Platforms	Google Colab, Kaggle, Jupyter, Git / GitHub, Streamlit Cloud, Postman, Render, Vercel.
Soft Skills	Product thinking, collaboration, leadership, communication, adaptability, problem-solving.
Languages	Bangla, English.

SELECTED PROJECTS

SolarTwin AI	Developed a Universal Spatio-Temporal Transformer (USTT) for multi-site solar forecasting. Achieved scale-invariance across heterogeneous microgrids with <1ms inference latency. Deployed as a Digital Twin dashboard. Links: GitHub · Live App
LENSGuard	Engineered a Hybrid Network Intrusion Detection System fusing 1D-CNN (for signatures) and Variational Autoencoders (VAE) (for zero-day anomalies). Features a deployed "Command Center" for real-time traffic monitoring. Links: GitHub · Live App
SafeSkinAI	Built a computational toxicology app predicting carcinogenicity using XGBoost and chemical fingerprinting. Features a "Glassmorphism" UI for real-time molecular visualization and risk assessment. Links: GitHub · Live App
Vehicle Management System	Full-stack Vehicle Management System. Deployed (frontend & backend) on Render; integrated Google Maps and Google Weather APIs; SMTP-based automated emails; JWT authentication; Stripe payment gateway; and automated PDF generation. Tech: React, Node.js, Express, MongoDB, Stripe, APIs.

**Sex Education Discourse
Dataset (US & UK)**

[Live Demo](#)

[GitHub](#)

Created a public Kaggle dataset of n-gram frequency time-series (1922–2022). Includes extraction scripts and per-corpus CSVs; released under CC BY 4.0.

RESEARCH & PUBLICATIONS (SELECTED)

- Voice-Based Parkinson’s Disease Detection using SVM & XGBoost. ([Paper Link](#))
- Reproducible Machine Learning Pipeline for Predicting Cosmetic Chemical Carcinogenicity and Reproductive Toxicity Using Molecular Descriptors and Fingerprints (Accepted at 28th ICCIT 2025).
- Clinical vs. Ultrasound for PCOS Detection: A Calibrated, Leakage-Safe, Real-Time Benchmark (Accepted at 28th ICCIT 2025).

CERTIFICATIONS

- Machine Learning with Python - EDGE Bangladesh (Nov 2024 - May 2025) [Certificate](#)
- Kaggle Courses: Feature Engineering, Data Visualization; Computer Vision; Intro to Deep Learning; Intermediate ML; Intro to Machine Learning; Pandas; Python (2024-2025) [Certificate](#)
- Artificial Intelligence Fundamentals (IBM SkillBuild, 2025) [Certificate](#)
- Machine Learning Using Python (Simplilearn, 2025) [Certificate](#)
- Machine Learning for Beginners (Simplilearn, 2025) [Certificate](#)

TRAINING & WORKSHOPS

- Machine Learning with Python - EDGE Bangladesh (Nov 2024 - May 2025) [Certificate](#)
- Seminar: Charting the Azure Horizon - Styava.dev & Microsoft (10 Dec 2024) [Certificate](#)
- Seminar: Generative AI in Copilot Studio - Styava.dev & Microsoft (7 Nov 2024) [Certificate](#)

ACTIVITIES

- Participant - Solvio AI Hackathon (2025)
- Participant - ICPC Dhaka Regional Preliminary Contest (2024)
- Volunteer - OBHIZATRIK Foundation (2022-2023)
- Cultural Captain - Karnafuli House, BCIC College (2018-2019)

EDUCATION

2022-present	BSc in Computer Science & Engineering, IUBAT	(CGPA: 3.82 current)
2020	Higher Secondary Certificate, BCIC College	(GPA: 5.00)
2018	Secondary School Certificate, Pallabi Bidya Niketan	(GPA: 5.00)

HOBBIES

- Watching Movies
- Exploring AI research updates
- Seeing Friends
